Mehsana, Gujarat

B.Tech IT student at Ganpat University with hands-on experience building AI-powered applications using Python, LLM APIs, and n8n workflow automation. Designed a production-grade campus AI assistant using NLP and vector search. Passionate about building intelligent systems — actively seeking AI/ML and automation intern roles.

TECHNICAL SKILLS

AI & LLMs	Python, LLM APIs (OpenAI / Claude), Prompt Engineering, NLP, Vector Search
Automation	n8n Workflow Automation, REST API Integrations, Webhook Design, Data Pipelines
ML & Data	Machine Learning, Pandas, NumPy, Scikit-learn (learning), CSV / JSON processing
Dev Tools	Git, GitHub, VS Code, Linux CLI

PROJECTS

Campus AI Assistant · [Ganpat University — Academic Project](#)

Jun 2025 – Jun 2026

Python · Pandas · Vector Search · LLM APIs · CSV/JSON

- CampusMateAI is an end-to-end, AI-powered campus assistant designed to simplify how students and faculty access institutional data like course schedules, administrative info, and academic FAQs.
- By replacing tedious searches through multiple PDFs, portals, and notices, the platform utilizes NLP-based query processing, LLM APIs, and Retrieval-Augmented Generation (RAG) to deliver instant, context-aware responses.
- Designed modular architecture allowing plug-and-play data source additions, making the system extensible for future departments

Blog – LinkedIn Pipeline · [Personal Project](#)

May – 2026

n8n · REST APIs · Webhooks · Prompt Engineering

Two-stage automated content pipeline built in n8n.

Stage 1 — Form input → scrape URLs → generate blog via Gemini API → fetch cover image → email approval → publish to Blogger.

Stage 2 — Live blog URL → LinkedIn story post → email approval → post. Wait nodes preserve pipeline state across approvals.

EDUCATION

B.Tech in Information Technology

2023 – 2027

Ganpat University — U.V. Patel College of Engineering, Mehsana, GJ

CGPA: 7.29

- Relevant coursework: Python, Data Structures & Algorithms, DBMS, Operating Systems, OOP

CERTIFICATIONS

Saylor University — [CS205: Building with Artificial Intelligence](#)

Saylor University — [ENGL210: Technical Writing](#)

Cisco Networking Academy — [Python Essentials 2](#)

GDG-OC UVPCE — [Google Cloud Study Jams 2025](#)

IBM Skills Build — Generative AI: From Prompt to Production

Skill India — Junior Software Engineer

ADDITIONAL

Languages: English (Professional) · Hindi (Native) · Gujarati (Native)

Currently learning: LangChain, RAG pipelines, FastAPI, Docker, SQL, AI Cloud Integration, Fine-Tuning
